Spaces to Go Web Development Associate Job Description

Company Introduction
Spaces to Go is the first online marketplace for sport and recreation spaces such as courts, fields and pools. We are creating a platform that allows the public to quickly and easily access recreational spaces that meet their needs, and that streamlines space management and marketing for recreational facility owners. In the US, this is a $3 billion market that is greatly underserved.

We are looking for a highly motivated and ambitious developer who wants to join an energetic team at an early stage in this high potential startup. This is an equity position with an opportunity to evolve into a salaried leadership role.

A successful candidate will be able to work closely with our business team and technical advisor, taking a prominent role in producing the beta version of our web app as well as future development phases including a mobile app.

Full stack experience is desired, but front end and back end developers will be considered.

In this position, you will have the opportunity to:

Work with:
- Technologies such as Bootstrap, Ruby on Rails, JavaScript
- AWS cloud, along with S3, EC2 and RDS

Build:
- Cool cloud based optimization applications
- A marketplace that is a win-win solution

Be a part of the sharing economy!

Requirements:
- Knowledge of Ruby on Rails or other similar back end framework
- Solid understanding of object oriented programming
- Knowledge of front-end technologies such as HTML/CSS, and JavaScript
- Knowledge of relational databases
- Understanding and appreciation of design and user interface principles
- Initiative in identifying open source functionality to be utilized in new feature development
- Passion for writing clean, efficient, readable code
- Proficient understanding of code versioning tools, such as Bitbucket
- Good verbal and written communication skills
- Ability to take direction and complete feature development in a largely autonomous environment
- Ability to work at least part-time

Summer positions as well as part time and full time positions are available. Applicants should express interest by emailing a resume to spacesstogo@gmail.com.
