

How to Calculate Your Major GPA

1. Multiply the number of course credits for a Questrom course by the grade earned in the course (see chart below). This equals your honor points for that course.
2. Add the total number of credits for all of your Questrom classes.
3. Add the total honor points for all of your Questrom classes.
4. Divide honor points by total credits.

For example, you get a B in FE442, a B- in FE445:

FE442	4 credits	x	3.0	=	12 honor points
FE445	4 credits	x	2.7	=	10.8 honor points
8 credits					22.8

22.8 divided by 8 credits = 2.85 GPA

*Credits for courses in which you receive an 'F' should be included in the denominator of the calculation.

Value of each grade

				4 credit courses	6 credit courses
A	=	4.0	=	16 honor pts	24 honor pts
A-	=	3.7	=	14.8	22.2
B+	=	3.3	=	13.2	19.8
B	=	3.0	=	12	18
B-	=	2.7	=	10.8	16.2
C+	=	2.3	=	9.2	13.8
C	=	2.0	=	8	12
C-	=	1.7	=	6.8	10.2
D	=	1.0	=	4	6

Your MAJOR GPA refers to all courses with the Questrom prefix, while your CONCENTRATION GPA only includes the four courses in your concentration.

Because the concentration consists of such a small number of courses, The Feld Career Center considers it misleading to include your concentration GPA on your resume unless you have completed all of the coursework for your concentration.
