Summer Year 3	Elective	Elective		6

This model is a course planning timeline for students who aim to complete their degree program in 3 years. Please note that the timeline for taking your core (the listed course numbers) is suggested but you can take courses in a different order if needed. Each summer term is split into Summer I and Summer II: we suggest you take only one course per summer term as they will meet two nights per week. 55 credits are needed to graduate.
