MSBA Technical Requirements

The following are technical requirements, along with recommendations, for the personal computer required for your MSBA program.

All Computers (Windows or Mac):

- **Laptop:** a minimum of 8GB of memory (16GB strongly recommended)
- For at-home use, a secondary monitor, if possible is strongly desired and recommended
- At least 256GB of unused disk space. **SSD** drive strongly recommended.
  - For more information, please see the technical notes on Questrom's IT Site, which can be found here.
- **Internet Speed:** 10 Mbps download and 2 Mbps upload is desired for a seamless connection
- **Administrator access** to your machine for the ability to **fully manage** software installation and updates is **required**.
  - Lack of Administrator access could prohibit the ability to complete required assignments and projects throughout the duration the MSBA program.
- Wireless Network Access: 802.11g/n (WPA2 support required)
- 64-bit processor
- Intel i5 processor or higher (or AMD equivalent)
- A service/support contract spanning the duration of the program is **strongly recommended**

Windows OS:

- Windows 10 or later (Windows 11 prefered)

Apple OS:

- Mac OSX 11 or later (OSX 12 prefered)
